ERASMUS - Slovakia

The day starts early in the morning. We left at 8 am by bus to Spiš castle. It was located in a green hilly landscape and with all the rain you had the feeling of being in Scotland. On the spot one of the slovakian student tells us a lot about the history of the castle and we had time to walk around.

The next stop was at Pútnická katedrála svätého Martina. It is a gothic, originally romanesque Cathedrale of St Martin in Spišske Podhradie. This was built in the 12. century from Benedictines.

Our last bus stop was in the city Levoča. It is located in the north of slovakia and has about 14 thousand inhabitants. On the spot, we visited the gothic church of St. James. This was built in the 14th century and is dedicated to St. James the Apostle. In the later afternoon we went to the bowling where we had a lot of fun.
