Erasmus Slovakia

Today was our last day in Slovakia. We started with a little work on our project, we presented the others the current situation of the E-book.

Then we moved on to physical activities. We were divided in 3 groups for the 3 different stations, which were judo, basketball and archery. Every group consisted of each two Spanish, two Polish, two Greek and two German people. On the different stations we had limited time to try these sports. It was much fun and interesting to try something new.

After that we moved on with the plan for the day, we all meet at the school hall again. There we got our certifications from the headmaster.

For lunch we visited once again the canteen and had again something undefinable, but as well as the last time it was really good.

Then we grabbed our things and went to the train station, of course it rained. After a travel longer than planned we arrived at the “Aqua City” in Poprad. There we spent some time swimming and relaxing. We had the chance to go in different pools, inside and outside, to slide or join some water gymnastics.

After 3 hours we went back to Spisska by train. Now it was time to say goodbye to the others. Because of the end of the travel we went for dinner one last time. On our way home from the restaurant we watched a concert in the park in front of our hotel.
